/ASSESSMENT · MOAWIN

QAT and PECTA assessment flow

Moawin teachers pick a test type first. PECTA runs the flow they have today. QAT lets them browse to a ready-made Quality Assurance Test paper by grade and subject. Try it on the left, then hand the spec on the right to the bot.

What changes

One new question, asked first, only for Moawin.
When a Moawin teacher sends /assessment and taps start, the first screen asks which kind of test they want. Rawalpindi teachers never see it and go straight to Grade, as they do now.

PECTA keeps the current flow exactly.
Grade, Subject, Chapters, where questions come from, how many and total marks, kinds of question, Ready, then a generated PDF. No edits to those screens.

QAT is a browse-and-make flow.
Grade, Subject, Units, Ready. There are no question-count or question-type screens because every QAT paper has the same fixed shape. The bot writes a new paper in that shape and sends it as a PDF.

The curriculum does not change.
QAT questions come from the same Punjab textbooks the bot already uses for PECTA. Only the shape of the paper is different. The next section gives that shape, so the bot needs no other file.

Same look as the existing flow.
Same WhatsApp Flow shell, green progress bar, "New assessment" header, radio rows and Continue button.

Flow map

MOAWIN TEACHER, PECTA

Test type → Grade → Subject → Chapters → Question source → Count + marks → Question kinds → Ready → PDF

MOAWIN TEACHER, QAT

Test type → Grade 2–5 → Subject → Units → Ready → Paper PDF

RAWALPINDI TEACHER

Grade → Subject → …unchanged… → PDF

Orange boxes are new screens.

How QAT questions are made

Same books, new format.
QAT stands for Quality Assurance Test, the annual test PEF runs in its partner schools. It tests the same Punjab textbook content as everything else, so the bot loads nothing new. PEF's content book is week-by-week by learning outcome, and a QAT covers the month before the test. The teacher picks those units on the Units screen, and every question must be answerable from the chosen units only.

Every QAT paper has the same frame.
25 marks, 30 minutes, three sections, each section banner showing its marks. The top box holds Roll No, Name, Gender tick, Time, Total Marks and Syllabus. Each question shows its marks as (marks per item × items = total), for example (1 × 13 = 13). Written questions get ruled lines or boxes. MCQs have four bubbled options A to D with one correct answer.

Language.
Maths and English print each instruction and question in English with the Urdu line underneath. The Urdu paper is entirely in Urdu.

Fresh every time.
Each request writes new questions on the same outcomes, so a teacher who asks again gets a different paper of the same shape.

Each row below is the blueprint for one grade and subject: what each of the three sections contains and what it is worth.

GRADE	SUBJECT	SECTION I	SECTION II	SECTION III
1	Maths	**10 marks.** Match numbers to counted objects (3 x 1). Write numbers in numerals and words (4 x 1). Encircle the smaller or greater of two numbers (3 x 1).	**8 marks.** Arrange numbers in ascending order (2 x 2) and in descending order (2 x 2).	**7 marks.** Write the number before, after or between (4 x 1). Write tens and ones of a 2-digit number (3 x 1).
1	English	**8 marks.** (a) Fill the missing letters of the alphabet (4). (b) Match pictures to their first sound (4).	**8 marks.** (a) Read and write three-letter words (4). (b) Match capital and small letters (4).	**9 marks.** (a) Look at the picture and write the word (4). (b) Write five words from given letters or a dictated list (5).

GRADE	SUBJECT	SECTION I	SECTION II	SECTION III
1	Urdu	**8 marks.** Recognise letters: match letter to picture, circle the letter named (objective items).	**8 marks.** Fill the missing letter, join letters to make a word.	**9 marks.** Write words from pictures and one short sentence.
2	Maths	**10 marks.** Write the number from place-value parts (3 x 1, one worked example shown). Numerals in words (4 x 1). Encircle the smallest of three numbers (3 x 1).	**8 marks.** Arrange five numbers in descending order (2 x 2) and in ascending order (2 x 2).	**7 marks.** Write the place value of an underlined digit (4 x 1). Encircle the greater number (3 x 1).
3	Maths	**10 marks.** Roman numerals and numbers written in words, short items worth 0.5 to 1 mark each.	**8 marks.** Ascending and descending order (2 x 2), plus counting objects and writing Roman numerals.	**7 marks.** Write numerals from words (4 x 1). Place numbers on a number line (3).
4, 5	Maths	**13 marks.** 13 MCQs, 1 mark each: place value, reading numbers, patterns, the four operations, small word items.	**8 marks.** Five short questions, answer any FOUR, 2 marks each: numbers in words, ascending order, add or subtract, standard form, pattern next terms.	**4 marks.** One word problem, 4 marks, with working space.
2	English	**8 marks.** (a) Fill missing letters (4). (b) Match pictures to their initial sound (4).	**8 marks.** (a) Circle words containing digraphs (4). (b) Fill blanks with he, she, it or they (4).	**9 marks.** (a) Naming words sorted into People, Places, Animals, Things (4). (b) Write five sentences using given words (5).
3	English	**7 marks.** Word-building: fill missing letters, underline common nouns, make words with consonant clusters.	**9 marks.** Silent letters, syllables, opposites, alphabetical order.	**9 marks.** Capital letters and punctuation, a short reading passage with questions, use any FOUR given words in sentences.

GRADE	SUBJECT	SECTION I	SECTION II	SECTION III
4, 5	English	**12 marks.** 12 MCQs, 1 mark each, many with pictures: collective nouns, articles, adjectives, countable nouns, rhymes, silent letters, syllables, plus a short passage with 2 MCQs.	**7 marks.** (a) Use any FOUR of five given words in meaningful sentences (4). (b) Punctuate any THREE of four sentences and rewrite them (3).	**6 marks.** Write a paragraph or a story from a prompt, with an OR choice and a small mind-map to plan it.
4, 5	Urdu	**12 marks.** 12 MCQs, 1 mark each: word meanings, synonyms, lesson questions, and three questions on a given couplet.	**7 marks.** Essay on a given topic, about 100 words, with a YA (or) choice of two topics.	**6 marks.** Application or letter writing, with a YA (or) choice of two.
2, 3	Urdu	Section I: short objective items such as fill in the blanks, matching and word-making.	Section II: word and sentence work, e.g. crossword, picture-to-word, sentence making.	Section III: short writing from a picture or prompt. Marks across the three sections must total 25.

What questions the bot makes from the content

One question tests one learning outcome.
Every unit in the textbook lists what students should be able to do: identify, read, write, count, compare, arrange, decompose, solve. The bot takes the outcomes of the units the teacher chose and writes a question for each. All exercises and examples in those textbook units are fair material, and nothing outside them is asked.

The outcome's verb sets the kind of question.
"Arrange numbers in ascending and descending order" becomes an arrange-in-order question. "Identify the place value of a digit" becomes an underlined-digit question. The tables below map content to question for each subject.

Easy to harder across the paper.
Section I recalls and recognises. Section II applies in short answers. Section III extends: a word problem, a paragraph, a letter.

Quality rules.
Spread questions across the chosen units. Use the textbook's own words, number ranges and examples, never harder ones. Each MCQ has one clear answer and three believable wrong options. Every request writes fresh questions on the same outcomes. The answer key comes from the same outcome the question tests.

Maths

WHAT THE CONTENT SAYS	QUESTION THE BOT MAKES
Identify, recognise, read a number	MCQ or circle the named number; match numbers to objects (Grades 1-2)
Write numbers in numerals and words	Write the number in words and words in numerals; Roman numerals where the unit teaches them
Count, count forward or backward	Count the objects and write the number; next or missing term in a pattern
Compare and order	Encircle the smaller or greater; arrange in ascending or descending order
Place value, expanded form, decompose	Place value of an underlined digit; tens and ones; expanded or standard form
Before, after, between	Write the number that comes before, after or between
Add, subtract, multiply, divide	Solve: straight sums as MCQs and short answers, numbers inside the grade's range
Apply to a situation	One word problem in Section III using the unit's operation, with working space

English

WHAT THE CONTENT SAYS	QUESTION THE BOT MAKES
Letter names and sounds (Grade 1-2)	Fill missing letters; match picture to first sound; match capital to small letter
Words from the unit's word list	Fill the missing letters; picture to word; sort words into columns (naming words)
Grammar taught in the unit	MCQs and fill-in-the-blank on nouns, articles, pronouns, adjectives, digraphs, syllables, silent letters
Punctuation and capitals	Punctuate the given sentences and rewrite them

WHAT THE CONTENT SAYS	QUESTION THE BOT MAKES
Reading a passage from the lesson	Short passage with 2 MCQs on it (Grade 4-5 Section I)
Sentence making	Use any FOUR of the given words in meaningful sentences
Writing	A paragraph or story from a prompt, with an OR choice (Grade 4-5); five sentences (Grade 2)

Urdu

WHAT THE CONTENT SAYS	QUESTION THE BOT MAKES
Letters and joining (Grade 1-2)	Match letter to picture; fill the missing letter; join letters into a word
Word meanings, synonyms, opposites	MCQs on words from the lesson
Lesson comprehension	MCQs and short answers from the prose lesson
Poetry	Three questions on a couplet from the poem (Grade 4-5)
Sentence making and word work	Make sentences from given words; crossword or picture to word (Grades 2-3)
Essay or composition	About 100 words on a topic linked to a lesson, with a YA (or) choice (Grade 4-5)
Letter or application	Application or letter in the taught format, with a YA (or) choice (Grade 4-5)

Screen copy

SCREEN	URDU	ENGLISH
Test type, title	ٹیسٹ کی قسم	Test type
Test type, question	پہلے انتخاب کریں: آپ کس قسم کا ٹیسٹ چاہتے ہیں؟	First choose which type of test you want.
QAT option	QAT—تیار شدہ پرچہ، کلاس اور مضمون کے مطابق	QAT, a ready-made paper by class and subject

SCREEN	URDU	ENGLISH
PECTA option	PECTA — اپنی مرضی کا پرچہ بنائیں	PECTA, build your own paper
QAT, Units screen	کن اکائیوں کا ٹیسٹ چاہیے؟	Which units is the test on?
QAT, final button	پرچہ بھیجیں	Send my paper

Urdu lines are first drafts. Run them through rumi-voice before shipping.

Build steps for the bot

1. **Add the Test type screen** as the first screen of the /assessment Flow, shown only to Moawin teachers. Use whatever field the bot already uses to tell Moawin teachers apart.
2. **Route PECTA** to the existing Grade screen with no other change.
3. **Add the QAT branch:** Grade, Subject (only the subjects listed for that grade), Units (pick one or more units from the book's chapter list), Ready (with an optional answer key).
4. **Generate the paper** from the blueprint for that grade and subject, using only the chosen units from the Punjab textbooks. Follow the frame and section rules exactly.
5. **Send the PDF** named like `QAT_Class4_Maths.pdf`. If the answer key was ticked, add it as a second page set marked "Answer key".
6. **Log the choice** (QAT or PECTA) on the assessment event.
7. **Test:** a Moawin teacher sees the new screen and both paths work end to end for every grade and subject listed; a Rawalpindi teacher sees no change.

Everything for the bot

One block. Paste it into the bot's chat. It holds the flow, the curriculum rule, the paper blueprint and the Urdu copy, so the bot does not need to open any other file.

```
Build this change to the /assessment WhatsApp Flow. Everything you need is in this
message; do not look for other files.

1. For Moawin teachers only, add a new first screen asking the test type: QAT or
PECTA (Urdu question in the spec). Rawalpindi teachers skip it and see no change.
2. PECTA: continue into the existing flow at Grade, no other change.
3. QAT: new branch in the same look as the existing flow: Grade, Subject, Units,
Ready, then send the PDF. No question-count, marks or question-type screens.
4. The curriculum does not change. Generate QAT questions from the same Punjab
textbooks used for PECTA, only from the units the teacher chose.
5. Build every QAT paper to the blueprint in the spec for that grade and subject:
frame, three sections, marks, question kinds, language rule. Each request writes
```

```
fresh questions.
5b. Choose question kinds from the content using question_making in the spec: each
question tests one learning outcome from the chosen units, and the outcome's verb
(identify, write, compare, decompose and so on) decides the kind. QAT is for Maths,
English and Urdu only, Grades 1 to 5. No Science.
6. Log test_type on the assessment event.
7. Test both paths end to end as a Moawin teacher, and confirm a Rawalpindi teacher
is unaffected.
